AxPLCcomm

Connect your PLC to Excel, Power BI and the cloud

With AxPLCcomm, Power BI, Excel and everyday office software read and write PLC data as if the PLC were a database, with no special driver. The data also reaches .NET programs, SCADA and the cloud.

Why AxPLCcomm

- One software for PLCs from several brands
- Real-time data with no manual typing
- Gateway to SQL, OPC UA and MQTT without coding
- Windows and Linux
- Manual in Portuguese, English and Spanish
- Support from the team that builds the product

Protocols

- Siemens S7-300, S7-400, S7-1200 and S7-1500
- Modbus TCP, including TLS
- EtherNet/IP: ControlLogix, CompactLogix, Micro800, SLC 500, PLC-5 and MicroLogix
- OPC UA (client)
- OPC DA (client, Windows)

Ways to use it

- COM component: Excel and Access (VBA), VBScript, VB6 and SCADA
- .NET library for C# and VB.NET
- Manager: several PLCs in a single object
- SQL Gateway: PostgreSQL, MySQL and SQL Server (Power BI, ERP, MES)
- OPC UA server for SCADA and MES
- MQTT Sparkplug B for cloud and IIoT

Who it is for

- System integrators
- Engineering, process and maintenance
- Industrial IT and developers

Requirements

- Windows 7 SP1 to 11 and Windows Server 2008 R2 SP1 or later, with .NET Framework 4.8
- .NET 10 edition, no COM: Gateway and DLL for .NET 8 or later
- Linux x64 (glibc 2.27 or later): Gateway

License and trial

- Per-computer license, activated in the program or by file, even offline
- Free 90-day trial with all features (up to 5 addresses and 1 connection per protocol)
